Finite Elements in Analysis and Design 11 (1992) 357–358
Elsevier

Contents Volume 11

Volume 11, Number 1, May 1992

S. ISKIERKA
Finite element analysis of the performance of a ferromagnetic solid-rotor motor 1
K.R. SIVADAS and N. GANESAN
Effect of coupling between symmetric and antisymmetric modes in composite thick shells of revolution 9
N. HARITOS and D.T. HE
Modelling the response of cable elements in an ocean environment 19
V. KUDASHOV
A finite element solution for contact problems of an elastic body and flexible tendons 33
M.D. MIKRENSKA and N.K. PETROV
A sparse matrix scheme for finite elements 47
R.D. COOK, J. AVRASHI and C.-H. LIN
Buckling analysis: Alternative formulations, error estimation, and adaptive meshing 55
N. KAWASHIMA, M. KASHIHARA and M. SUGIMOTO
A combination of the finite element method and the rigid-body spring model for plane problems 67
A.K. NOOR, J.A. TANNER and J.M. PETERS
Sensitivity of tire response to variations in material and geometric parameters 77
M. ISREB
Distributed finite elements optimal structural design on between microcomputers—A new expert system tool 87

Volume 11, Number 2, June 1992

A.K. NOOR and J.M. PETERS
Postbuckling of multilayered composite plates subjected to combined axial and thermal loads 91
S. ANANTHA RAMU and R. GANESAN
Stability analysis of a stochastic column subjected to stochastically distributed loadings using the finite element method 105
N.K. PRINJA
Combined beam elements for large dynamic motion of whipping pipes with fluid–structure interaction 117
J.S. SANDHU, K.A. STEVENS and G.A.O. DAVIES
The behavior of geodetic shell structures with longitudinal members 153
Y. GUAN and L. TANG
A quasi-conforming nine-node degenerated shell finite element 165

Volume 11, Number 3, July 1992

Special NASTRAN Issue

G. SOMAYAJULA and R.J. YANG
Effective component design synthesis using structural and shape optimization methods 179
B.P. WANG, S.P. CALDWELL and C.M. SMITH
Improved eigensolution reanalysis procedures in structural dynamics 191
D.S. RIHA, H.R. MILLWATER and B.H. THACKER
Probabilistic structural analysis using a general purpose finite element program 201
T. TING, T.L.C. CHEN and W.J. TWOMEY
Finite element model refinement with actual forced responses of structures 213
A. MIKAILI and J. BERNARD
Structural redesign using nearly zero section reinforcements 221

S.K. KWON and J.E. BERNARD
Design optimization based on Padé expansions 235
W.S. CHAN, K.L. LAWRENCE, Y.F. KING and C. TANG
Design analysis of composite angle clips 247
R.J. YANG, D.L. DEWHIRST, J.E. ALLISON and A. LEE
Shape optimization of connecting rod pin end using a generic model 257

Volume 11, Number 4, August 1992

A.K. GĄSIORSKI
Analysis of the transient electromagnetic field in a conducting bushing 265
J. PADOVAN, A. KAZEMPOUR, F. TABADDOR and B. BROCKMAN
Alternative formulations of rolling contact problems 275
I. BABUŠKA, L. PLANK and R. RODRÍQUEZ
Quality assessment of the a-posteriori error estimation in finite elements 285
S.H. LO and C.K. LEE
On using meshes of mixed element types in adaptive finite element analysis 307
O. BERKOL
An algebraic algorithm to treat the contact with friction in linear static analysis of discretized systems 337
